

ABA: 2693

S0

This is an axial brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly black, with a blue highlighted region indicating areas of increased activity or uptake. The blue region is concentrated in the lower part of the brain, specifically in the posterior horns of the lateral ventricles and the surrounding white matter. The image is overlaid with a white grid consisting of a horizontal line and two vertical lines. The text 'ABA: 2693' is located in the top left corner, and 'S0' is located in the bottom left corner.
