

ABA:276063

Tg

The image displays a fluorescence microscopy scan of a plant specimen, likely a leaf or stem section, against a black background. The specimen exhibits a bright blue fluorescence, which is distributed across its surface. The fluorescence is more intense in certain areas, particularly along the edges and in the lower-left quadrant. A white crosshair is overlaid on the image, with a vertical line and a horizontal line intersecting at the center of the specimen. The text 'ABA:276063' is located in the top-left corner, and 'Tg' is in the bottom-left corner.
