DG

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The top-left quadrant shows a bright, irregularly shaped region of fluorescence, primarily in shades of blue and cyan, with some yellow-green highlights. The top-right quadrant is mostly dark blue. The bottom-left quadrant shows a smaller, more diffuse area of fluorescence. The bottom-right quadrant is also mostly dark blue. The overall background is black.
