

ABA: 67815942

CA2/CA3

This fluorescence microscopy image displays a coronal section of a brain. The image is divided into four quadrants by a white crosshair. The left half of the image shows bright, localized fluorescence in yellow and green, indicating the presence of ABA (67815942) and CA2/CA3. The right half of the image is predominantly dark blue, indicating a lack of significant fluorescence in that region. The overall shape of the brain section is roughly oval, with the central ventricular system visible as a dark area in the middle.
