CA2/CA3

This is a fluorescence microscopy image of a brain section, specifically highlighting the CA2/CA3 region. The image is characterized by a dark background with a central, irregularly shaped area of bright blue and cyan fluorescence. This fluorescent area is divided into several smaller, interconnected regions by darker, non-fluorescent tissue. A prominent, bright cyan spot is visible in the upper-left quadrant of the fluorescent area. The overall shape of the fluorescent region is roughly circular, with some internal structure and texture. The image is overlaid with a white grid consisting of a vertical line and a horizontal line, intersecting at the center of the fluorescent area. The text 'ABA: 68158082' is located in the top-left corner, and 'CA2/CA3' is located in the bottom-left corner, both in white font.
