S0

A blue brain scan image, likely a PET or SPECT scan, showing a cross-section of a brain. The image is predominantly blue, with a vertical line and a horizontal line intersecting at the bottom center. The vertical line is slightly to the left of the center, and the horizontal line is at the bottom. There are some faint, lighter blue areas within the brain structure, possibly indicating areas of increased activity or pathology. The overall shape is roughly circular, representing the brain's cross-section.
