

ABA: 68191558

SCN

The image displays a coronal cross-section of a brain. Two prominent, blue-colored regions are visible, representing areas of activation or structural change. These regions are roughly oval-shaped with irregular, lobulated borders. They are positioned symmetrically on either side of a central vertical line, which likely represents the midline of the brain. The background is solid black. In the top-left corner, the text 'ABA: 68191558' is displayed in white. In the bottom-left corner, the text 'SCN' is displayed in white. A thin horizontal white line runs across the middle of the image, intersecting the vertical midline.
