

ABA: 68341250

Arc

This is an astronomical image of a galaxy, likely a barred spiral galaxy, shown in a color-coded format. The image is centered on a black background. The galaxy's structure is primarily blue, with a bright, elongated core region in the upper-left quadrant that transitions through green and yellow to a small red tip, indicating a high concentration of light or a specific spectral feature. A white crosshair is superimposed on the image, with its vertical line passing through the core and its horizontal line intersecting the lower part of the galaxy. The text 'ABA: 68341250' is located in the top-left corner, and 'Arc' is in the bottom-left corner.
