VA/VL

An axial brain scan image with a blue highlighted region. The image shows a cross-section of the brain with a central vertical line representing the midline. The highlighted area is located in the posterior horns of the lateral ventricles, appearing as two small blue spots on either side of the midline. The rest of the brain tissue is shown in a dark blue color. A white crosshair is overlaid on the image, with the vertical line passing through the midline and the horizontal line passing through the level of the highlighted region.
