

ABA: 68844223

S0

A brain scan image, likely an MRI or PET scan, showing a cross-section of the brain. The image is predominantly black, with a bright blue region in the center, indicating a specific area of interest or abnormality. The blue region is roughly circular and has some internal structure, possibly representing a lesion or a specific anatomical feature. The image is overlaid with a white grid, consisting of a horizontal line and two vertical lines, dividing the image into four quadrants. The text 'ABA: 68844223' is located in the top left corner, and 'S0' is in the bottom left corner.
