

ABA: 69014836

CA1

This fluorescence microscopy image displays a coronal section of a brain. The image is characterized by a dark background with blue and cyan fluorescent signals. A prominent, bright cyan/yellowish horizontal band of fluorescence is visible in the upper-middle section, likely representing the corpus callosum or a similar white matter tract. Other smaller, less intense blue spots are scattered throughout the brain tissue. A white crosshair is overlaid on the image, with the vertical line passing through the center of the bright band. The text 'ABA: 69014836' is located in the top left corner, and 'CA1' is in the bottom left corner.
