

ABA: 69028515

VMH

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the ventral medial hypothalamus (VMH). The image is a coronal section, with the brain's midline visible. The VMH region is highlighted in blue, indicating the presence of a specific marker or protein. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA: 69028515' is in the top left, and 'VMH' is in the bottom left. There are two bright spots in the upper left quadrant, and a single bright spot in the lower left quadrant. The rest of the brain section is dark, indicating no signal or low signal.
