CPu medial

The image displays a coronal cross-section of a human brain. The left hemisphere (viewer's left) shows a prominent area of activation, indicated by a color gradient from blue to yellow. This activation is localized in the lower-left quadrant of the brain slice. The right hemisphere (viewer's right) appears mostly inactive, represented by a uniform blue color. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the middle of the slice.
