CPu medial

A coronal section of a brain, likely from a rodent, showing the medial view of the corpus callosum (CPu). The image is a heatmap where blue indicates low activity and red/yellow indicates high activity. A prominent, bright yellow/red spot is visible in the upper left quadrant, indicating a region of high metabolic or functional activity. The rest of the brain tissue shows varying degrees of blue and light blue activity. The image is overlaid with a white grid consisting of a vertical line and a horizontal line intersecting at the center.
