

ABA: 69407481

OB anterior

The image displays a brain scan, likely a PET or SPECT scan, showing two distinct, blue, lobulated regions of activity. These regions are positioned symmetrically on either side of a central vertical line, which appears to be the midline of the brain. The background is black, and the blue color indicates areas of increased metabolic or functional activity. The text 'ABA: 69407481' is located in the top left corner, and 'OB anterior' is in the bottom left corner, providing context for the scan.
