

ABA: 69407582

SCN

This image is a fluorescence micrograph of a brain section. It features two main regions of interest: the SCN (Suprachiasmatic Nucleus) on the left and the ABA (Aryl Hydrocarbon Receptor-expressing cells) on the right. The SCN is labeled with the text 'SCN' in the bottom left corner. The ABA is labeled with the text 'ABA: 69407582' in the top left corner. Both regions are filled with a bright blue signal, indicating the presence of the fluorescent marker. The image is divided into four quadrants by a vertical and a horizontal white line.
