

ABA: 69446316

CA1

This fluorescence microscopy image displays a coronal section of a brain. The CA1 region, located on the left side of the image, is characterized by a complex, swirling pattern of bright blue fluorescence. In contrast, the ABA region, located on the right side, appears as a more uniform, solid blue area. A white crosshair is overlaid on the image, with its vertical line separating the CA1 and ABA regions and its horizontal line passing through the middle of the brain section.
