

ABA: 69514738

SCN

This image is a fluorescence microscopy scan of a brain section. It is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant shows a bright blue fluorescent signal, indicating the presence of a specific marker. The top-right quadrant is dark, showing no signal. The bottom-left quadrant is labeled 'SCN' and the bottom-right quadrant is labeled 'ABA: 69514738'. The overall image is in grayscale, with the fluorescent signal appearing as bright blue/white spots against a dark background.
