

ABA : 69530905

SC

This image is an axial brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The brain is outlined in blue. A prominent focal area of increased activity is visible in the upper left quadrant of the image, corresponding to the left frontal region. This area is colored in a gradient from blue to yellow to red, indicating higher intensity. The rest of the brain shows relatively uniform, low-intensity activity. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA : 69530905' is located in the top left corner, and 'SC' is in the bottom left corner.
