

ABA: 69549246

CA1

This is a fluorescence microscopy image of a brain section, likely from a rodent. The image shows a coronal slice with a central vertical sulcus. The left hemisphere (viewer's left) shows several bright, localized spots of fluorescence, indicating areas of high signal intensity. The right hemisphere (viewer's right) appears mostly dark, suggesting low or no signal. A white crosshair is overlaid on the image, with the vertical line passing through the central sulcus. The text 'ABA: 69549246' is in the top left, and 'CA1' is in the bottom left.
