CA1

The image shows a coronal cross-section of a brain. A large, irregularly shaped region in the left hemisphere is highlighted in a solid blue color. This region covers most of the left hemisphere, extending from the lateral surface towards the midline. A small, distinct blue spot is visible in the upper part of the left hemisphere, near the midline. The rest of the brain slice is black. A white crosshair is overlaid on the image, with a vertical line passing through the midline and a horizontal line passing through the center of the brain slice.
