

ABA: 69568986

ventral S

The image displays a brain scan, likely an fMRI or PET scan, with a color scale ranging from blue (low activity) to yellow (high activity). A prominent yellow region is visible in the ventral area, indicating a localized area of high activity. The rest of the brain shows low activity, represented by blue. A white grid is overlaid on the image, and the text 'ventral S' is visible in the bottom left corner.
