Cb lobe

The image displays a coronal brain scan with a blue overlay representing a specific region. A small, bright, multi-colored spot (red, yellow, green, blue) is visible on the left side of the image, indicating a localized area of high intensity or activation. The rest of the brain area shown is a uniform blue color. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the level of the activation spot.
