

ABA: 69671720

ME

This is a coronal PET scan of a human brain. The image shows a cross-section of the brain with a color scale where blue represents low metabolic activity and yellow/green represents high metabolic activity. A distinct, localized area of high activity is visible in the left hemisphere, near the center of the brain. The rest of the brain tissue appears mostly blue, indicating lower metabolic activity. A white crosshair is overlaid on the image, with the vertical line passing through the center of the high-activity region. The text 'ABA: 69671720' is in the top left, and 'ME' is in the bottom left.
