

ABA: 69736112

Cb lobe

The image is a brain scan, likely an fMRI or PET scan, showing a cross-section of the brain. A small, bright, multi-colored spot (yellow, orange, and red) is visible on the left side of the image, indicating a localized area of high activity or signal. The rest of the brain area shown is predominantly blue, suggesting lower activity levels. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the spot of high activity. The text 'ABA: 69736112' is in the top left corner, and 'Cb lobe' is in the bottom left corner.
