M

The image consists of two side-by-side panels. The left panel shows a bright, elongated, and slightly curved source of light, primarily blue with a yellowish-white core, set against a dark background with some faint, diffuse blue structures. The right panel shows a uniform, solid blue field. A thin white crosshair is centered over the image, with a vertical line passing through the center of both panels and a horizontal line passing through the center of the left panel.
