

ABA: 69816344

CA1

A fluorescence microscopy image showing a neuron with a blue cytoplasmic stain. The neuron has a central soma and several branching processes. A small, bright blue spot is visible within the soma. The image is overlaid with a white grid consisting of a vertical line and a horizontal line. The text 'ABA: 69816344' is in the top left, and 'CA1' is in the bottom left.
