

ABA:70301082

Tg

This is a false-color astronomical image of a galaxy, possibly a barred spiral. The image features a bright, irregularly shaped central region with a color gradient from blue to yellow. Two prominent, bright, reddish-yellow spots are visible on either side of the central region, suggesting active galactic nuclei or star-forming regions. The image is overlaid with a white crosshair, and the text 'ABA:70301082' is in the top left and 'Tg' is in the bottom left.
