

ABA:70302503

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half of the image shows a bright, irregularly shaped region with a color gradient from blue to yellow, indicating high fluorescence intensity. This region is labeled 'CA1' in the bottom-left corner. The right half of the image is dark blue, indicating low fluorescence intensity. The label 'ABA:70302503' is located in the top-left corner.
