

ABA:70439171

Hb

This fluorescence microscopy image displays a coronal section of a brain. The image is characterized by a dark background with a prominent blue signal. This signal is concentrated in a vertical column on the left side of the image, indicating the presence of Hb. The signal intensity varies, with some areas appearing brighter (cyan) than others (blue). A horizontal white line and a vertical white line intersect at the center of the image, dividing it into four quadrants. The label 'ABA:70439171' is located in the top left corner, and 'Hb' is in the bottom left corner.
