

ABA:70593129

Pn

The image displays two coronal slices of a human brain. The left hemisphere (viewer's right) shows a distinct, localized area of high-intensity activation, indicated by a color gradient from blue to yellow. The right hemisphere (viewer's left) appears mostly uniform in blue, suggesting no significant activation. A vertical white line separates the two hemispheres. The text 'ABA:70593129' is in the top left, and 'Pn' is in the bottom left.
