

ABA:70719036

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half shows a complex, convoluted structure, likely the hippocampus, with a prominent bright yellow-green region in the upper-middle part and a smaller bright spot in the lower-left. The right half is mostly dark blue, indicating a lack of signal or a different tissue type. The text 'ABA:70719036' is in the top-left corner and 'CA1' is in the bottom-left corner.
