

ABA:70919896

OB anterior

A fluorescence microscopy image of a brain section. The image is predominantly black, with a central region of blue fluorescence. This blue signal is concentrated in two main lobes, likely representing the olfactory bulb (OB), and is symmetrically distributed across the midline. A white crosshair is overlaid on the image, with the vertical line passing through the center of the blue signal and the horizontal line passing through the middle of the lobes. The text 'ABA:70919896' is located in the top left corner, and 'OB anterior' is in the bottom left corner.
