

ABA:70946471

VMH

A coronal brain section image, likely from a rodent, showing a localized area of high signal intensity (red/yellow) in the left hemisphere, labeled ABA:70946471. The image is divided into two halves by a vertical line, with the label VMH in the bottom left corner. The high signal area is located in the medial prefrontal cortex, specifically in the ventromedial hypothalamus (VMH) region. The rest of the brain tissue shows low signal intensity (blue).
