

ABA:70946633

SCN

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a bright, irregularly shaped region of high fluorescence, primarily in shades of cyan and yellow, indicating a high concentration of the fluorescent marker. The right half of the image is mostly dark blue, indicating low fluorescence. The text 'ABA:70946633' is located in the top left corner, and 'SCN' is located in the bottom left corner.
