

ABA: 71020765

GP

An axial brain scan image showing a focal lesion in the basal ganglia (GP). The image is a grayscale axial slice of a brain, with a central vertical line representing the midline. A small, bright, multi-colored spot (yellow, orange, red, and blue) is visible in the lower-left quadrant, indicating a focal area of abnormality. The rest of the brain tissue is shown in shades of gray, with a dark background. The text "ABA: 71020765" is located at the top left, and "GP" is located at the bottom left.
