

ABA:71023032

VMH

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the ventral medial hypothalamus (VMH). The image is presented in a split-field format, with the left half showing a control or baseline state and the right half showing a state after treatment with ABA (71023032). The brain tissue is stained with a blue fluorescent marker, and the VMH region is highlighted in a darker blue. A vertical white line separates the two halves of the image. The text 'ABA:71023032' is visible in the top left corner, and 'VMH' is visible in the bottom left corner.
