

ABA: 71232740

A posterior

The image displays a cross-sectional brain scan, likely a PET or SPECT scan, with a color scale ranging from black (low activity) to red (high activity). A prominent, localized area of high activity is visible in the left posterior region of the brain. The rest of the brain shows relatively low activity. A vertical white line is positioned to the right of the focal area, and a horizontal white line is positioned below it, intersecting at the focal area. The text 'ABA: 71232740' is located at the top left, and 'A posterior' is at the bottom left.
