

ABA: 71280682

CA1

This fluorescence microscopy image displays a brain section with two primary regions of interest. The CA1 region, located on the left, is characterized by a complex, branching pattern of bright blue and yellow-green fluorescence. The ABA region, located on the right, is a large, solid, and uniformly blue area. A white crosshair is overlaid on the image, with its vertical line passing through the boundary between the CA1 and ABA regions and its horizontal line passing through the center of the CA1 region.
