

ABA: 71325402

CA2/CA3

A fluorescence microscopy image of a brain section, likely from a rat, showing the CA2/CA3 region. The image is a heatmap where colors represent intensity, ranging from blue (low) to yellow (high). The CA2/CA3 region is highlighted in yellow and orange, indicating high fluorescence. The rest of the brain section is mostly blue, indicating low fluorescence. The image is divided into four quadrants by a vertical and a horizontal white line. The text "ABA: 71325402" is in the top left, and "CA2/CA3" is in the bottom left.
