

ABA:71587888

MD

This is a coronal brain MRI scan. The image shows a cross-section of the brain with a central lesion, likely in the midline structures. The lesion is characterized by a bright blue core, surrounded by a darker blue ring, and then a larger area of lighter blue. The surrounding brain tissue is dark blue. A white crosshair is overlaid on the image, with the vertical line passing through the center of the lesion and the horizontal line passing through the middle of the brain. The text 'ABA:71587888' is in the top left corner, and 'MD' is in the bottom left corner.
