A anterior

An anterior view of a human pelvis. A large, irregularly shaped area in the center is shaded in a solid blue color. This shaded area covers the pubic bones, the anterior surface of the iliac bones, and the upper part of the ischial bones. The rest of the pelvic region, including the lesser trochanters and the pubic rami, is not shaded. A thin white line runs vertically down the center, separating the left and right halves of the pelvis. A thin white line runs horizontally across the middle of the image, passing through the pubic area.
