

ABA: 71763583

Cb lobe

The image displays a blue brain scan, likely an axial slice. A prominent vertical structure, possibly the corpus callosum, runs through the center. A small, bright blue spot is visible in the midline, just below the center. The scan is overlaid with a white grid consisting of one horizontal and two vertical lines. The text 'ABA: 71763583' is located in the top left corner, and 'Cb lobe' is in the bottom left corner.
