

ABA: 71763753

VMH

This fluorescence microscopy image displays a coronal section of a brain. The image is divided into two main regions by a vertical white line. The left region shows a complex pattern of blue and yellow fluorescence, indicating the presence of a specific marker. The right region is predominantly blue, suggesting a different level of fluorescence or a different tissue type. A horizontal white line intersects the vertical one, creating a crosshair that serves as a reference point. The text 'ABA: 71763753' is located in the top left corner, and 'VMH' is in the bottom left corner.
