

ABA: 71789879

SCN

The image shows a coronal section of a brain, likely from a rodent, with a dark background. Two large, symmetrical, light-colored regions represent the cerebral hemispheres. A horizontal line and a vertical line intersect at the center, dividing the image into four quadrants. The label 'ABA: 71789879' is in the top-left quadrant, and 'SCN' is in the bottom-left quadrant. The SCN (Suprachiasmatic Nucleus) is indicated by a small, dark, circular spot in the lower-left quadrant, just above the horizontal line and to the left of the vertical line. The rest of the brain tissue is stained a uniform light blue.
