VMH

The image shows a coronal section of a brain. A large, irregularly shaped region in the medial prefrontal cortex is highlighted in blue. This region is roughly symmetrical across the midline but slightly larger on the left side of the image. It covers a significant portion of the upper half of the brain slice. The rest of the brain tissue is shown in grayscale. A vertical white line runs down the center of the image, and a horizontal white line runs across the middle, intersecting at the center of the brain slice.
