

ABA:73521810

LH

This is a coronal PET scan image of a human brain. The image displays metabolic activity using a color scale where blue represents lower activity and yellow/white represents higher activity. A prominent, bright yellow-white focal area is visible in the central region of the brain, likely corresponding to the left hemisphere. The surrounding brain tissue shows a more uniform, lower-level blue signal. A white crosshair is overlaid on the image, with the vertical line passing through the center of the focal area. The text 'ABA:73521810' is located in the top left corner, and 'LH' is in the bottom left corner.
