

ABA: 73817986

DG

This is a fluorescence microscopy image of a brain section, likely a coronal slice. The image shows a symmetrical pattern of fluorescence, with the most intense signal (yellow and red) concentrated in the central region, possibly the hippocampus or a similar structure. The surrounding tissue shows lower intensity (blue and green). A vertical white line is drawn through the center of the image, and a horizontal white line is drawn across the middle. The text 'ABA: 73817986' is in the top left, and 'DG' is in the bottom left.
