

ABA:74272037

A anterior

This is an axial PET scan of a human brain. The image shows metabolic activity with a color scale from blue (low activity) to yellow (high activity). The brain's anatomy is visible, including the cerebral cortex, white matter, and central structures like the ventricles and brainstem. A vertical white line is positioned on the left side of the image, and a horizontal white line is positioned at the bottom. The text 'ABA:74272037' is in the top left, and 'A anterior' is in the bottom left.
