

ABA: 74562588

VMH

This is a fluorescence microscopy image of a brain section. The image is predominantly dark, with a large, irregularly shaped, bright blue region in the center. This region is divided into two main parts by a vertical white line. The left part is smaller and more elongated, while the right part is larger and more rounded. A horizontal white line crosses the middle of the image. In the top left corner, the text 'ABA: 74562588' is visible. In the bottom left corner, the text 'VMH' is visible. The bright blue spot is located in the upper part of the left region, near the vertical white line.
